

Honeywell Power Products

12A Fire Power Supply

BENEFITS

- Class-Leading Power
- Trouble Memory Feature
- Resistor Compare Eases Retrofits
- SYNC Protocol for Five A/V Providers Built In
- Chassis Mount Option Simplifies Multi-Supply Installations

HPFF12

HPFF12CM

IP and GSM Fire Communicator

BENEFITS

- Fire Communications Without the Expense of Phone Lines
- Savings to Customer Maintaining Communications Integrity (No Phone Charges)
- Multi-Path Communications Improves Connectivity
- Uses Alarmnet Central Stations
- Full Contact ID Reporting

IPGSM-COM

What's New From Fire-Lite Alarms!

 **Fire-LITE® Alarms**
by Honeywell

MS-25

25 POINT FIRE ALARM CONTROL

The MS-25 is the latest addition to the broad array of Fire-Lite Alarms offerings, which have long set the standard for providing a solution to satisfy every application. The new, 25 point MS-25 fire alarm control panel provides a cost-effective addressable solution to meet even the smallest specification.

But unlike other small panels, the MS-25 is a fully featured, Addressable alternative...at a Conventional panel price. It runs on only a single loop of standard wire, provides pin-point identification, and includes maintenance alerts and auto-programming. The MS-25 supports any combination of its own HFS detectors and modules (see below).

So don't over-specify. Right-size every opportunity with the right fire alarm control panel, as cost-effectively as possible. With the new, MS-25 from Fire-Lite Alarms!

MS-25 25 Point Fire Alarm Control

- Right-sized, giving "Addressable" benefits at a low Conventional alarm price
- Factory programmed, or use your web browser
- Built-in communicator
- Uses any wire
- Uses cost-effective Honeywell Fire Systems Detectors and Modules

DETECTORS & MODULES	DESCRIPTIONS
HFS-P	Photoelectric Smoke Detector
HFS-PT	Photoelectric Smoke & Thermal Detector
HFS-T	Thermal Detector
HFS-MR	Addressable Relay Module
HFS-MM	Addressable Mini Monitor Module
HFS-D	Addressable Duct Detector with Photoelectric Smoke
HFS-DPR	Replacement Photoelectric Smoke for Duct Detector

HFS-P

HFS-MR

MS-9200UDLS

NEW FEATURES ADDED

The MS-9200UDLS is the proven workhorse of the Fire-Lite Alarms line, and has been improved with new features identified through Fire-Lite's rigorous Voice-of-the-Customer process.

MS-9200UDLS 198 Point Fire Alarm Control

- Updated design in response to customer requests
- New removable terminal blocks
- Aux power increased to 2.0A
- Second ANN BUS connectivity
- Synchronizes up to 16 FACP's
- Improved protection against electrical shock damage

ROME RELAY OPTION MODULE ENCLOSURE

The new Relay Option Module Enclosure eliminates the need for multiple single gang enclosures. It also operates off the annunciator BUS, and therefore does not consume a device point.

ROME Relay Option Module Enclosure

- 10 Relay card, plus remote enclosure for mounting option for 2nd card
- Mounting for multiple SLC modules
- ANN BUS and SLC connectivity
